## Downloading and installation of Tableau:

First you need to download the Tableau for desktop application

1. Go to the Tableau official website(<https://www.tableau.com/>).
2. Click on "Try Tableau for Free" at the top right of the page.
3. Choose Tableau Desktop and fill in your details (email, company, etc.).
4. Once completed, the download will begin automatically.
5. After downloading, run the installer and follow the prompts to complete the installation.

Here's a basic overview of how Tableau works and its main components with implementation:

### 1. Selecting a Dataset:

- Start Tableau and connect to your data. You can select a dataset from various sources like text files, Excel spreadsheets, databases, etc.

**Example:** Use a dataset like "VgSales".

**Implementation:** Click on "**Connect**" → Choose "**Text File**" or "**Microsoft Excel**" → Select your dataset → Tableau loads the data into the workspace.

### 2. Data Connection:

- After selecting your dataset, Tableau will load the data into the workspace. You can preview and clean the data if needed.

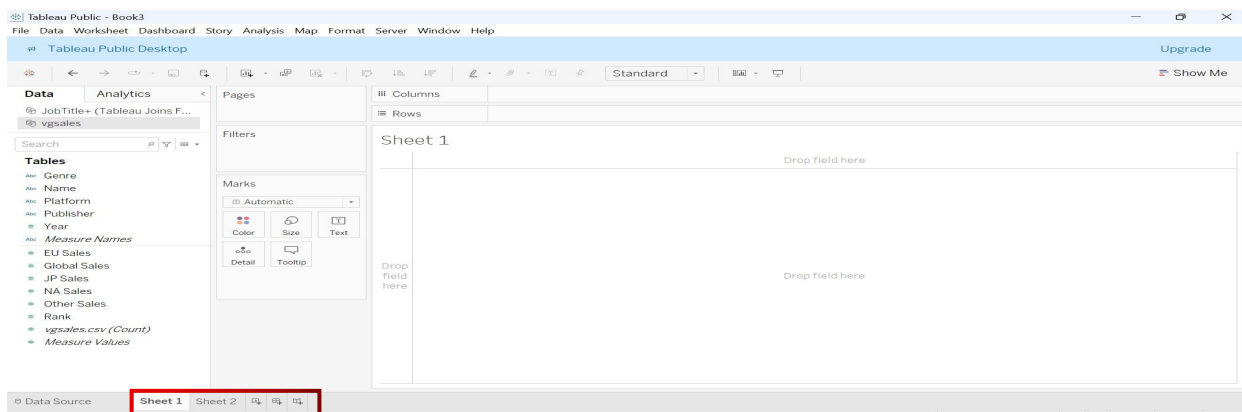

Once the data is loaded, review it in the **Data Source** tab. You can clean or rename fields here if needed.

### 3. Worksheet:

- Go to a new worksheet where you can begin creating visualizations. Worksheets are where you build your charts and graphs.

Click on the **Sheet 1** tab (default worksheet). This is where you drag and drop fields to create your visualizations.

## 4. Rows and Columns:

- Drag fields from the data pane into the Rows and Columns shelves. This defines the structure of your visualization, with Rows typically representing categories and Columns representing values.

The screenshot shows the Tableau Public Desktop interface. The 'Connections' pane on the left lists 'vgsales' as a Text file. The 'Files' pane shows a list of files, including 'article2.txt', 'CaesarCipherExample.txt', 'code latex.txt', 'CompletionRepo...-sharmila.csv', 'Departments.csv', 'directory.csv', 'emails.csv', 'Fake.csv', 'gender\_classi...fe\_791531.csv', 'Modern nursing cover letter.txt', and 'New Union'. The 'Fields' table is displayed, showing the structure of the 'vgsales.csv' data source. The table has 11 fields: Rank, Name, Platform, Year, and Genre. The 'Fields' table is as follows:

## 6. Adding Filters:

- To focus on specific parts of your data, you can add filters. Drag a field to the Filters shelf and configure the filter criteria to narrow down the data displayed.

## 7. Bins:

- Bins are used to group continuous data into discrete ranges. To create bins, right-click a field, select “Create,” and then “Bins.” You can specify the bin size to group data, such as creating ranges for years.

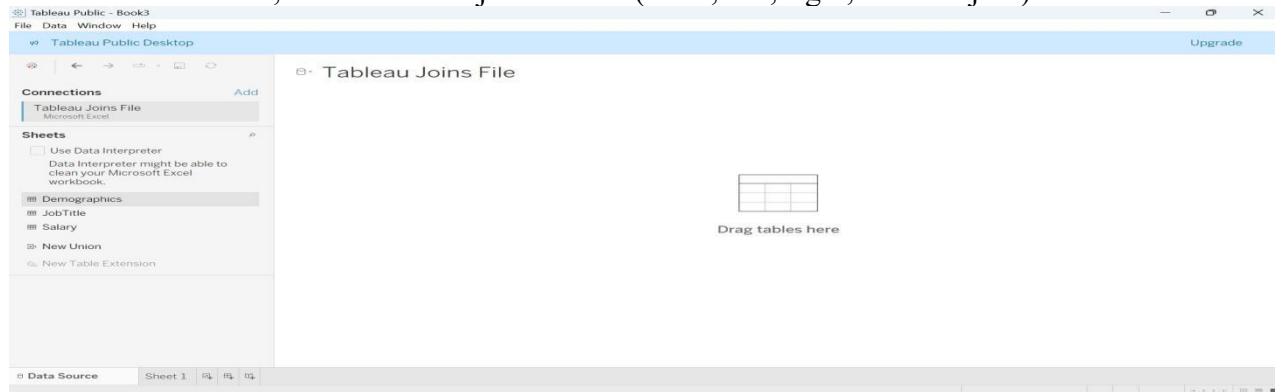

## 8. Calculated Fields:

- Calculated fields allow you to create new data fields based on existing ones. Go to the Analysis menu, select “Create Calculated Field,” and write a formula to compute new values.

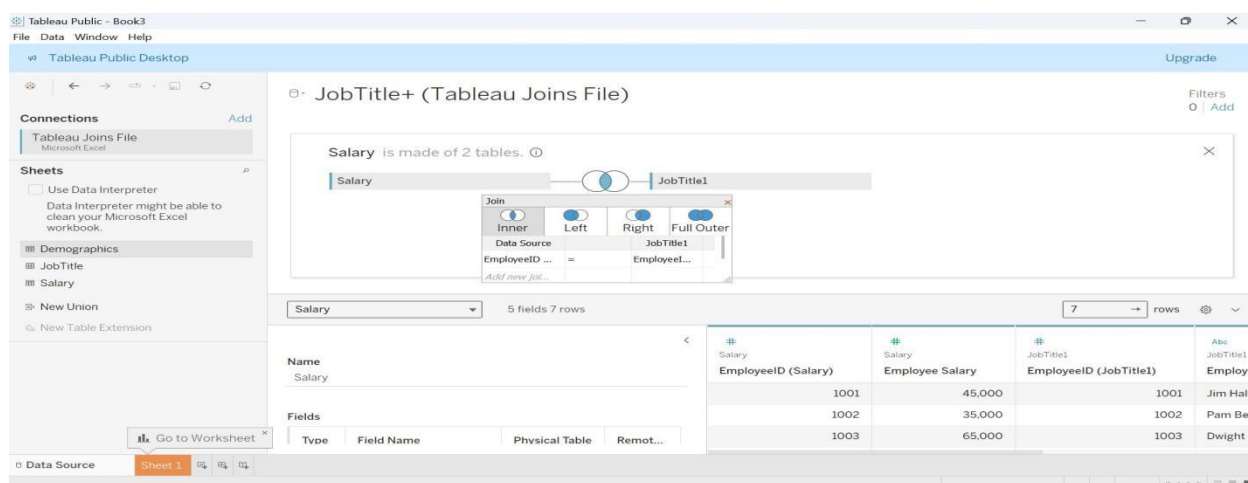

**9. Pie Charts:** - To create a pie chart, drag a categorical field to the Color shelf and a measure field to the Angle shelf. Pie charts are useful for showing proportions of a whole.

## 10. Joins:

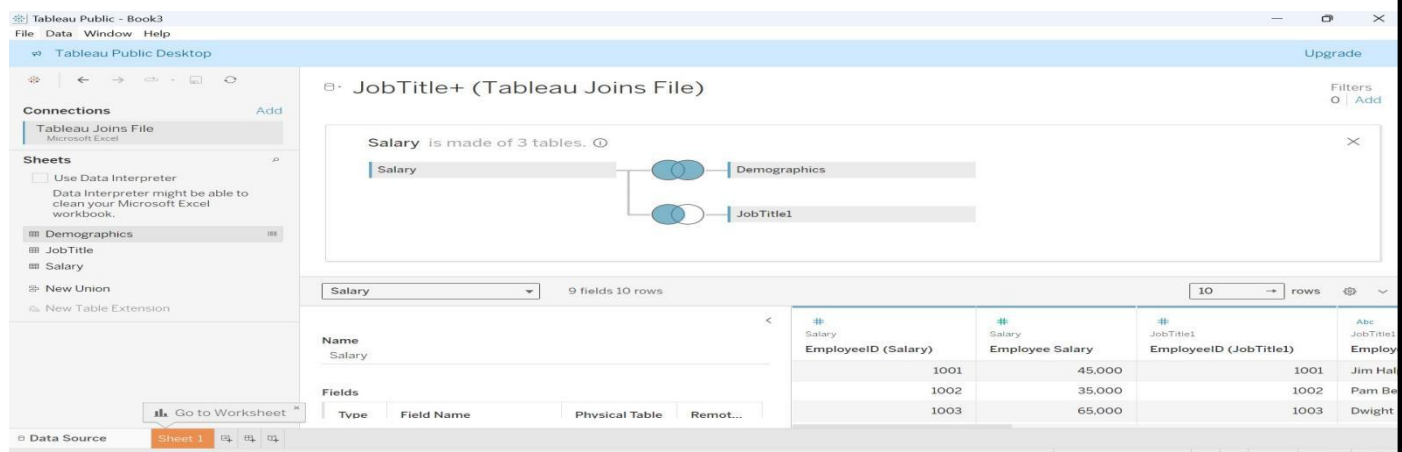

- To combine data from multiple tables, you can use joins. Go to the Data Source tab, drag and drop tables onto the canvas, and define the join criteria (inner, left, right, or outer join) to combine the data.

Drag tables and implement the joins

You can customise the joins and the Data field names

This dataset provides a rich source of information for analyzing trends in video game popularity, performance across regions, and sales distribution among different platforms, genres, and publishers.

The screenshot shows the Tableau Public Desktop interface. The 'Connections' pane on the left lists the 'vgsales' text file. The 'Files' pane shows a list of files, including 'article2.txt', 'CaesarCipherExample.txt', 'code latex.txt', 'CompletionRepo...-sharmila.csv', 'Departments.csv', 'directory.csv', 'emails.csv', 'Fake.csv', 'gender\_classi...fe\_791531.csv', 'Modern nursing cover letter.txt', 'New Union', and 'New Table Ext...'. The 'vgsales' dataset is selected, showing 11 fields and 16598 rows. The 'Fields' pane displays the following mapping:

| Type | Field Name   | Physical Table | Remote Field N... |
|------|--------------|----------------|-------------------|
| Abc  | Genre        | vgsales.csv    | Genre             |
| Abc  | Publisher    | vgsales.csv    | Publisher         |
